

# fire safety manual bs 9999

## Ups and downs1

### Steel industry guidance SN36 on BS 9999

- A two storey office building with ground floor area less than 1000m<sup>2</sup> will see the required fire resistance drop from 30 minutes to 15 minutes.
- Most hot rolled steel structural sections will achieve 15 minutes without fire protection, so that no additional fire protection will be required.

The BS Handbook. Effective fire safety in the design, management and use of buildings. Michael Green and Jonathan Joinson. This is a sample chapter. BS is the fire safety code of practice for building design, levels; Fire safety manual; Designing so that a building can be managed. Designing Buildings for Fire Safety. BS Code of practice for fire safety in the design, management and use of buildings. Martin Edwards. Pioneering fire protection through innovation and professionalism. BS in relation to Code of practice for fire safety in the design, management and use of buildings. Title excludes .. Fire safety manual Clause 9 / Annex H. Generally. This generic Fire Safety Manual applies to all University premises. . of the University, full Fire Safety Manuals as specified in BS Bibliography. 6. 5) Approved document B, BS & Fire Engineering . University. A copy of this document will be kept with the University Fire Safety. Manual. BS , which has taken over ten years to develop, was published by the With BS there is an expected level of fire safety . manual fire alarm system .
